INSTRUCTIONS FOR CONNECTING TO THE STUDENT NETWORK

1. CONNECTION METHOD

-The **user** plugs an **Ethernet** cable with an RJ-45 end into the Ethernet socket, the other side of the cable plugs into the **device**.

2. USING THE STUDENT NETWORK

-The first time the user attempts to access the **browser** and the **Internet**, the network will force the user to log in with an Internet access **account**. If the login page does not appear, then user needs to manually go to page: sso.man.olsztyn.pl

-UWM students have personal **eduroam** accounts from the University created in USOSweb system.

-People from outside of the University have accounts created by the Network Administrator, in order to create an account you must report to the **Dorm Manager**.

Once you have logged into an active **account**, student network access will be assigned to your **device** and you will be able to use the **Internet**.
